1. Introduction & System Overview

NamasteExpress (नमस्ते एक्सप्रेस) is a full-featured bilingual (Nepali + English) news portal. The Admin Panel is the private control center where your team writes news, manages the calendar widgets (holidays, gold/silver, forex, rashifal), moderates reader comments, runs advertisements, and configures the whole site.

What you can manage from the Admin Panel

- **Content:** Articles, Categories, Tags, Media files, Reels (short videos), Photo Galleries, Breaking-news tickers.
- **Nepali calendar data:** Holidays, Gold & Silver prices, Foreign-exchange (Forex) rates, Daily Rashifal (horoscope).
- **Community:** Comment moderation, Newsletter subscribers.
- **Monetisation:** Advertisements and ad positions.
- **Administration:** Users & roles, Site Settings, Analytics, and a security Audit Log.

How to reach the Admin Panel

Open your site in a browser and go to the `/admin` path — for example `https://your-site.com/admin`. You must be signed in with an Admin, Editor, or Author account. If you are not signed in you will be sent to the login page; if you are signed in with a reader account you will be sent back to the public homepage.

Language of the interface: Most labels appear in Nepali with smaller English sub-labels. You can flip every menu label to English using the **EN / ने** toggle in the sidebar header (see Section 4).

2. User Roles & Permissions

Every account has one of four roles. The role decides which menu items appear and what actions are allowed. The panel hides menu items you cannot use, so two people may see different menus.

Role	Intended for	Can do
ADMIN	Site owner / manager	Everything — full access to all 20 sections including Users, Settings, Ads, Newsletter, and Audit Log.
EDITOR	Newsroom editor	All content + calendar data + comments + analytics. <i>Cannot</i> manage Users, Settings, Ads, Newsletter, or view the Audit Log.
AUTHOR	Reporter / writer	Dashboard, Articles, and Media only. Writes and edits articles and uploads images.
READER	Public visitor	No admin access. Can read, comment, bookmark, and subscribe on the public site only.

Menu visibility by role

Section	Admin	Editor	Author
Dashboard	✓	✓	✓
Articles	✓	✓	✓
Media	✓	✓	✓
Categories, Tags, Comments	✓	✓	—
Sports, Reels, Galleries, Breaking News	✓	✓	—
Analytics, Holidays, Gold-Silver, Forex, Rashifal	✓	✓	—
Ads, Newsletter, Users, Settings, Audit Log	✓	—	—

Self-protection rule: An Admin cannot change their own role (the dropdown becomes a read-only badge for your own account). This prevents accidentally locking yourself out of admin access.

3. Logging In & Account Access

3.1 Signing in

1. Go to `/auth/login` (or try to open `/admin`, which redirects you there).
2. Enter your **Email** and **Password**.
3. Click **Login**. On success you land on the Dashboard.
4. Alternatively, click **Login with Google** to sign in with a Google account (the account must already exist with an admin-level role to reach the panel).

3.2 Default seeded accounts

On a freshly seeded database, three demo accounts exist. **Change these passwords immediately on a live site.**

Role	Email	Password
Admin	<code>admin@namastexpress.com</code>	<code>Admin@12345</code>
Editor	<code>editor@namastexpress.com</code>	<code>Editor@12345</code>
Author	<code>author@namastexpress.com</code>	<code>Author@12345</code>

3.3 Forgot password

On the login screen, click **Forgot password?** to start the email-based reset flow at `/auth/forgot-password`. A reset link is sent to the registered email address.

3.4 Logging out

Use the **Logout / लॉगआउट** button at the bottom of the sidebar. You are returned to the public homepage.

Security: The panel is protected on the server — every admin page re-checks your role on each request. Never share your credentials. Use the Audit Log (Admins) to review who changed what.

4. The Admin Layout

Every admin screen shares the same frame: a fixed **left sidebar** for navigation and a scrollable **main area** on the right.

4.1 The sidebar

- **Brand header:** Shows the site logo (or a “न” badge) and “Admin Panel”. Click it to jump back to the Dashboard.
- **Navigation list:** Menu items filtered by your role. The current page is highlighted. Each item shows an icon, a Nepali label, and a smaller English label.
- **EN / ने toggle** (top-right of the header): Switches all menu labels between Nepali and English. Your choice is remembered in the browser.

4.2 Footer controls (bottom of sidebar)

Control	What it does
Font size — A- / A / A+	Shrinks, resets, or enlarges the panel text. The setting is saved in your browser and persists between visits.
Dark Mode / Light Mode (🌙 / 🌞)	Toggles the admin colour theme. Saved per browser.
Back to site	Opens the public website homepage.
Logout	Signs you out and returns to the homepage.

4.3 On mobile / small screens

The sidebar collapses. Tap the **hamburger (☰) button** at the top-left to open the menu; tap the ✕ or the dark overlay to close it. Selecting any menu item closes the drawer automatically.

Autopilot: All theme, language, and font preferences are personal to your browser and do not affect what visitors or other admins see.

5. Dashboard

Menu: **ड्यासबोर्ड / Dashboard** · Access: **ADMIN** **EDITOR** **AUTHOR**

The Dashboard is your landing page and a live snapshot of the whole site. Everything here is read-only summary data with shortcut links — you do not edit anything directly on this page.

5.1 Top action buttons

- 🌐 **साइट हेर्नुहोस् (View Site)**: Opens the public homepage.
- + **नयाँ लेख (New Article)**: Jumps straight to the article editor.

5.2 Stat cards (top row)

Six clickable cards, each links to the matching section:

Card	Shows	Links to
कुल लेखहरू (Total Articles)	Total article count + how many are published	Articles
कुल भ्युज (Total Views)	Lifetime view count + today's page views	Analytics
टिप्पणीहरू (Comments)	Pending count + approved count	Comments
विज्ञापन (Ads)	Number of active advertisements	Ads
प्रयोगकर्ता (Users)	New users in the last 7 days	Users
ट्यागहरू (Tags)	Total tags + total categories	Tags

5.3 Today's Activity panel (आजको गतिविधि)

- Articles published today, page views today (with an ↑/↓ % trend vs yesterday), new users today, and pending comments.
- A **This month vs last month** comparison of published articles with a percentage trend badge.

5.4 Category breakdown (वर्ग अनुसार लेखहरू)

Horizontal bars showing how many published articles each of your top 5 categories holds. Includes a **व्यवस्थापन → (Manage)** link to Categories and quick links to **New Article**, **Analytics**, and **Settings**.

5.5 Recent Articles (हालका लेखहरू)

A table of the 8 most recently created articles: title (click to edit), category, status badge, author, view count, and date. Use **सबै हेर्नुहोस् → (View all)** to open the full Articles list.

6. Articles — Create, Edit, Publish, Delete

Menu: लेखहरू / **Articles** · Access: **ADMIN** **EDITOR** **AUTHOR**

This is the heart of the news portal. Articles support both Nepali and English fields, draft/publish workflow, featured images, tags, and an AI summary.

6.1 The article list

- **+ New Article** button (top-right) opens the create form.
- **Search box:** Finds articles by Nepali or English title (case-insensitive).
- **Status filter:** All Status / Draft / Published / Archived. Click **Filter** to apply.
- **Table columns:** Title (click to edit), Category, Status badge, Author, Views, Date.
- **Pagination:** 20 articles per page with Previous / Next at the bottom.

Status	Meaning
DRAFT	Work in progress. Not visible to the public.
PUBLISHED	Live and visible on the public site.
ARCHIVED	Retired/hidden but kept in the system.

6.2 Creating a new article

The form has two columns — main content on the left, publishing options on the right.

Main content (left)

Field	Required	Notes
Title (Nepali)	Yes	The headline shown on the site.
Title (English)	No	Optional English headline.
Slug	Yes	The URL piece. Auto-generated from the Nepali title (supports Devanagari and Latin). You can edit it manually.
Excerpt	No	Short summary used in listings/previews.
Content	Yes	The article body. A live counter shows word count and estimated reading time (≈200 words/min).
AI Summary	No	An optional short summary that can appear as a quick read-up.

Sidebar options (right)

Field	Notes
Status	Draft / Published / Archived. Choose Published to make it live immediately.
Category	Required. Pick one from the dropdown (loaded from your Categories).
Tags	Tick any number of tags from the scrollable list.

Featured Image	Paste an image URL, or click Upload to pick a file from your computer — it uploads and fills the URL automatically.
Featured Article	Tick to highlight this article in featured placements on the site.

Click **Create Article** to save. The button shows “Creating...” while it works, then returns you to the article list. Errors (e.g. missing required fields or a duplicate slug) appear in a red box at the top.

6.3 Editing an existing article

Click any article title to open the editor. It shows the same fields as the create form, plus:

- **Read-only stat cards:** views, comment count, created date, and current status (colour-coded).
- **Slug “Regenerate” button** to rebuild the slug from the current Nepali title.
- Separate **Excerpt (English)** and **Content (English)** fields in addition to the Nepali ones.
- A featured-image preview that appears once a URL is set.
-  **Save Changes** (परिवर्तन सेभ गर्नुहोस्) — shows “Saving...”, then a green success message.
- If the article is Published, a  **View on site** link opens the live page in a new tab.
- An **Info card** listing the author, article ID, and created / published / last-updated dates.

6.4 Deleting an article

In the editor, click the red  **लेख मेटनुहोस् (Delete Article)** button. A confirmation dialog appears.

Deletion is permanent. Once confirmed, the article cannot be recovered. If you only want to hide it, set its status to **Archived** instead.

7. Categories

Menu: **वर्गहरू / Categories** · Access: **ADMIN** **EDITOR**

Categories are the main sections of your news site (e.g. Politics, Sports, Economy). Every article belongs to exactly one category.

7.1 Create / edit form

Field	Required	Notes
Name	Yes	Nepali name. While creating, the slug auto-fills from this name.
Name (English)	No	Optional English label.
Slug	Yes	URL piece; editable.
Color	—	A colour picker (default deep red <code>#c62828</code>). This colour is used for the category's badge across the site.
Sort Order	—	A number that controls the display order (lower numbers appear first). Default 0.
Active	—	Checkbox (on by default). Inactive categories are hidden from the public.

Click **Create Category** (or **Update Category** when editing) to save. A **Cancel** button appears while editing.

7.2 Category table

Columns: Name, Slug, Color (swatch + hex), Sort Order, Articles (count), Status, Actions. Use **Edit** to load a row into the form.

You cannot delete a category that still has articles. The Delete button is disabled until the article count is 0. Move or delete those articles first, or set the category to Inactive.

8. Tags

Menu: **ट्यागहरू / Tags** · Access: **ADMIN** **EDITOR**

Tags are free-form keywords (e.g. "election", "monsoon") that you attach to articles for cross-topic discovery. An article can have many tags.

8.1 Adding a tag

- **नाम (नेपाली) / Name (Nepali)**: required.
- **Name (English)**: optional.
- Click + **थप्नुहोस् (Add)**. The button is disabled until you type a name and shows "थप्दै... (Adding...)" while saving. The slug is generated automatically.

8.2 Managing tags

A header shows the total tag count. The table lists Name, English name, Slug, article count, and actions.

- **सम्पादन (Edit)**: Edit the Nepali and English names inline, then **सेभ (Save)** or **रद्द (Cancel)**.
- **मेदनुहोस् (Delete)**: Asks for confirmation, then removes the tag.

Tags are assigned to articles from the article editor's **Tags** checklist. Create the tag here first so it appears there.

9. Comments Moderation

Menu: **टिप्पणीहरू** / **Comments** · Access: **ADMIN** **EDITOR**

Reader comments arrive as **Pending** and stay hidden from the public until you approve them.

9.1 Filtering

Use the status dropdown — **All / Pending / Approved / Rejected / Spam** — and click **Filter**. The list shows 20 per page.

9.2 The comment table

Columns: Content (truncated), Article it belongs to, User (name or email), Status badge, Date, and Actions.

Status	Meaning
PENDING	Awaiting your review (hidden from public).
APPROVED	Visible under the article.
REJECTED	Hidden / declined.
SPAM	Marked as spam.

9.3 Moderating

- **Approve** (green): publishes the comment. Hidden when already approved.
- **Reject** (red): hides the comment. Hidden when already rejected.
- Buttons show “Updating...” briefly while the change saves.

The Dashboard’s “Pending comments” number tells you at a glance when there is moderation work waiting.

10. Media Library

Menu: मिडिया / Media · Access: **ADMIN** **EDITOR** **AUTHOR**

A central store for all images, videos, and PDFs used across the site.

10.1 Adding files

- **+ Upload File:** Choose a file from your computer (images, videos, or PDF). It uploads and appears in the grid. The button shows "Uploading..."
- **Add by URL:** Paste an external file URL and click **Add URL**. Invalid URLs are rejected with an "Invalid URL" message.

10.2 Browsing & searching

Files appear as a responsive grid of cards showing a thumbnail (or  for video /  for documents), the original file name, and file size. Use the **Search** box to find by name. Pagination shows 20 per page.

10.3 Per-file actions

- **Edit:** Opens an inline box to set the *alt text* (important for accessibility and SEO). Save with ✓, cancel with ✕.
- **Del:** Deletes the file after a confirmation prompt.

When you click **Upload** on an article's featured image, an ad image, a reel thumbnail, etc., the file is added to this same Media Library.

11. Advertisements & Ad Positions

Menu: **विज्ञापन / Ads** · Access: **ADMIN** only

Manage banner advertising. The page has two tabs: **Advertisements** and **Positions**. A stats row shows Total Ads, Active, Positions, total Impressions, and overall CTR (click-through rate).

11.1 Positions tab — define where ads can appear

Create the slots first, then assign ads to them.

Field	Notes
Position Name	Required. A handle such as <code>home-header</code> .
Type	HEADER (), SIDEBAR (), IN_ARTICLE (), BETWEEN_SECTIONS (), FOOTER (), or POPUP ().
Width / Height	Optional pixel dimensions of the slot.

Click **+ Add**. Positions show as cards with their type, an active dot, and how many ads are assigned.

11.2 Advertisements tab — create the ads

Field	Required	Notes
Title	Yes	Internal name for the ad.
Position	Yes	Pick one of the positions you created.
Target URL	Yes	Where clicks lead.
Image	No	Paste a URL or click  Upload . A preview appears.
Start / End Date	No	Optional scheduling window.

Click  **Create Ad**. The ads table shows Title, Position, Preview, Impressions, Clicks, CTR (green if above 2%), Status, and Actions.

- **Status pill** (● Active / ○ Inactive): click it to toggle the ad on/off instantly.
- **Delete**: removes the ad after confirmation.

12. Sports — Tournaments & Matches

Menu: खेलकुद / Sports · Access: ADMIN EDITOR

Track tournaments and live match scores. Two tabs: **Tournaments** and **Matches**.

12.1 Tournaments tab

Create with a row of fields: **Name**, **Slug**, and **Sport** (e.g. football, cricket), then **Create**. The table shows each tournament’s name, sport, number of matches, and active status.

12.2 Matches tab

Field	Notes
Tournament	Required. Pick from your tournaments.
Home Team ID / Away Team ID	Required. Entered as team IDs (see note below).
Match date/time	Required. A date-and-time picker.
Venue	Optional.

Click **Create Match**. In the matches table you can **Edit** a row inline to update the live **score** (two number boxes) and the **status**:

Status	Meaning
UPCOMING	Not started.
LIVE	In progress.
COMPLETED	Finished.
CANCELLED	Called off.

Save or Cancel your inline edits with the buttons that appear.

Note: This page references teams by their ID; there is no team-creation form here, so teams must already exist in the database.

13. Reels

Menu: **रिस्स / Reels** · Access: **ADMIN** **EDITOR**

Short vertical videos shown in the site's reels feed.

13.1 Create a reel

Field	Required	Notes
Title	Yes	Display title.
Slug	Yes	URL piece.
Video URL	Yes	Link to the video file/stream.
Thumbnail URL	No	Paste a URL or click Upload to add an image.
Description	No	Optional caption.

Click **Create Reel**. The table lists Title, Views, Status, Date, and Actions.

13.2 Edit / delete

Edit lets you change the title, video URL, thumbnail URL, and status (Active/Inactive) inline, then Save or Cancel. **Delete** removes the reel after confirmation.

14. Galleries

Menu: ग्यालेरीहरू / **Galleries** · Access: **ADMIN** **EDITOR**

Photo galleries (collections of images).

14.1 Create a gallery

Field	Required	Notes
Title	Yes	Gallery name.
Slug	Yes	URL piece.
Description	No	Optional.
Cover Image URL	No	Paste a URL or click Upload .

Click **Create Gallery**. The table shows Title, number of Images, Status, Date, and Actions. **Edit** updates the title and active status; **Delete** removes it after confirmation.

Note: Adding individual photos into a gallery is handled outside this list view; this screen manages the gallery records themselves.

15. Breaking News

Menu: ब्रेकिङ न्युज / **Breaking News** · Access: **ADMIN** **EDITOR**

The scrolling red ticker / alert strip at the top of the site.

15.1 Create an item

Field	Required	Notes
Title	Yes	The headline text shown in the ticker.
Article Link (Article ID)	No	Optionally link the ticker to a full article by its ID.
Expires At	No	Date/time when the item should stop showing. Leave blank for "Never".

Click **Create**. The form clears and the list refreshes.

15.2 Manage items

The table shows Title, linked Article, Status, Expiry, Created date, and Actions. Status is computed automatically:

- **Active** — currently showing.
- **Inactive** — turned off.
- **Expired** — past its expiry time.

Activate / Deactivate toggles visibility, **Edit** opens an inline panel (title, article ID, expiry), and **Delete** removes the item after confirmation.

16. Analytics

Menu: विश्लेषण / Analytics · Access: [ADMIN](#) [EDITOR](#)

A read-only insights dashboard. There are no inputs to fill — only data and links.

- **KPI cards** with ↑/↓ trend badges: Total Articles, Total Views, Users, and Comments — each links to its section.
- **Page views — last 7 days:** a bar chart with Nepali weekday labels, plus “today’s page views” (trend vs yesterday) and “this month” (trend vs last month) tiles.
- **Article statistics:** published today, this month (with trend), total published, drafts, today’s views, today’s comments.
- **Category breakdown:** coloured bars per category.
- **User growth:** total / today / this week / this month, plus comment-status tiles (approved, pending, today).
- **Top 10 most-viewed articles:** a ranked table (title links to the editor).

17. Holidays (Nepali Calendar)

Menu: **बिदाहरू** / **Holidays** · Access: **ADMIN** **EDITOR**

Feeds the Nepali calendar (Patro) with public and cultural holidays. Entries are stored against both Bikram Sambat (BS) and AD dates.

17.1 Add a holiday

Click + **Add Holiday** to reveal the form:

Field	Required	Notes
Title (Nepali)	Yes	Holiday name.
Title (English)	No	Optional.
BS Year / Month / Day	Yes	Bikram Sambat date (year default 2082, month 1–12, day 1–32).
AD Date	Yes	The Gregorian equivalent date.
Type	—	On the add form: Public or Cultural. (Editing offers more: public, cultural, restricted, observance.)
Public Holiday	—	Checkbox, on by default.

Save or Cancel. The table lists Title, BS date, AD date, Type, whether it is public, and Actions (Edit inline / Delete with confirmation).

18. Gold & Silver Prices

Menu: सुन-चाँदी / Gold-Silver · Access:

ADMINEDITOR

Daily precious-metal rates shown in the calendar/finance widgets.

18.1 Add a price entry

Click + **Add Price**:

Field	Required	Notes
Date	Yes	The day the rate applies.
Fine Gold / tola	Yes	Price of fine (24k) gold per tola.
Tejabi Gold / tola	Yes	Price of tejabi gold per tola.
Silver / tola	Yes	Silver price per tola.
Source	—	Defaults to FENEGOSIDA .

The table shows the latest 30 entries by date. Edit any row inline or Delete it (with confirmation).

19. Forex Rates

Menu: विनिमय दर / **Forex Rates** · Access: **ADMIN** **EDITOR**

Foreign-currency exchange rates (against NPR), grouped by date.

19.1 Add a rate

Click + **Add Rate**:

Field	Required	Notes
Date	Yes	Rate date.
Currency Code	Yes	e.g. USD (default).
Currency Name	No	Full name, e.g. US Dollar.
Unit	Yes	How many units the rate refers to (default 1).
Buy Rate NPR	Yes	Buying rate in rupees (2 decimals).
Sell Rate NPR	Yes	Selling rate in rupees (2 decimals).

Rates are listed in per-date cards. Edit inline or Delete (with confirmation). Shows the latest 50 entries.

20. Rashifal (Horoscope)

Menu: राशिफल / **Rashifal** · Access: **ADMIN** **EDITOR**

Daily horoscope predictions for the 12 zodiac signs (मेष, बृष, मिथुन, कर्कट, सिंह, कन्या, तुला, बृश्चिक, धनु, मकर, कुम्भ, मीन).

20.1 Add a prediction

Click + **Add Rashifal**:

Field	Required	Notes
Sign	Yes	Pick one of the 12 signs from the dropdown.
Nepali name	—	The Nepali sign label (e.g. मेष).
AD Date	Yes	The day the prediction applies.
Prediction (Nepali)	Yes	The horoscope text.
Prediction (English)	No	Optional translation.
Rating	—	1–5 “luck” stars (default 3).

The table shows the sign (with emoji), date, a truncated prediction, and a star rating. Edit any row inline or Delete it (with confirmation). Shows the latest 24 entries.

21. Newsletter Subscribers

Menu: **सदस्यता / Newsletter** · Access: **ADMIN** only

A read-only list of people who signed up through the site's footer newsletter form.

- Two stat cards: **Total** subscribers and **Active** subscribers.
- **Search box:** find a subscriber by email.
- **Table:** Email, Language, Source ("website" if not set), Status (Active/Inactive), and signup date. 20 per page.

This page is for reference only — there are no add/edit/delete actions. Subscriptions are created by visitors on the public site.

22. Users Management

Menu: प्रयोगकर्ता / **Users** · Access: **ADMIN** only

View all accounts and change their roles.

- **Table columns:** Name, Email, Role, Active status, Created date.
- **Role dropdown:** Change a user between READER, AUTHOR, EDITOR, and ADMIN. The change saves immediately and the list refreshes.

You cannot change your own role. Your own row shows a fixed badge instead of a dropdown, so you can never accidentally demote yourself out of admin access.

Promote a trusted writer to **AUTHOR** so they can post articles, or to **EDITOR** to also manage categories, comments, and calendar data. Reserve **ADMIN** for people who should control settings, users, ads, and billing-style data.

23. Settings

Menu: **सेटिंग्स / Settings** · Access: **ADMIN** only

Site-wide configuration. Edit any field, then click **Save Settings** at the top (it shows “Saving...”, then a green “Settings saved successfully” message).

23.1 Branding

- **Site Name (Nepali / English)** and **Tagline (Nepali / English)**.
- **Logo**: paste a URL or click **Upload**; a live preview is shown.
- **Primary Color**: a colour picker (default **#c62828**) used as the site’s main accent.

23.2 Contact Information

Phone, Email, and Address (Nepali & English).

23.3 Social Media

URLs for Facebook, Twitter/X, YouTube, Instagram, and TikTok.

23.4 Feature Toggles

Checkboxes to turn site features on or off globally: **Comments**, **Bookmarks**, **Reels**, and **Galleries**.

Turning off a feature (e.g. Comments) hides it across the whole public site. Double-check before saving.

24. Audit Log

Menu: **अडिट लॉग / Audit Log** · Access: **ADMIN** only

A read-only security trail of important admin actions — useful for accountability and investigating changes.

- **Search:** by admin name or affected entity.
- **Action filter:** All / Create / Update / Delete / Publish / Settings Change.
- **Table columns:** Admin (who), Action (colour-coded badge), Entity (what was affected), Entity ID, and Timestamp. 30 entries per page.

Action badge	Colour
CREATE	Green
UPDATE	Blue
DELETE	Red
PUBLISH	Purple
SETTINGS_CHANGE	Amber

25. Common Conventions & Quick Reference

25.1 Conventions used everywhere

- **Required fields** are marked with  or enforced by the browser — you cannot save without them.
- **Slugs** (URL pieces) auto-generate from the title and accept both Nepali (Devanagari) and English characters; you can always edit them.
- **Image uploads** everywhere use the same Media Library — click any **Upload** button to pick a file; the resulting URL fills in automatically.
- **Status pills:** green = Active/Published, gray = Inactive/Draft, amber = Archived/Inactive, red = Live/Rejected depending on context.
- **Deletes** always ask for confirmation in a browser pop-up and are usually permanent.
- **Bilingual data:** Articles, categories, and tags have Nepali + English fields; calendar data stores both BS and AD dates.

25.2 Status colour legend

Pill	Used for
	Active, Published, Approved
	Inactive, Draft, Spam
	Archived, Pending, Expired
	Rejected, Live match, Delete actions

25.3 Typical workflows at a glance

1. **Publish a news story:** Articles → + New Article → fill Title/Content → pick Category & Tags → set Featured Image → Status = Published → Create Article.
2. **Run a banner ad:** Ads → Positions tab → create a position → Advertisements tab → create the ad pointing at that position → toggle it Active.
3. **Update daily rates:** Gold-Silver / Forex → + Add → enter today's date and figures → Save.
4. **Moderate community:** Comments → filter Pending → Approve or Reject each.
5. **Onboard a writer:** Users → set their role to Author (or Editor) → they sign in at </admin>.

26. Troubleshooting & FAQ

Problem	What to check
I open <code>/admin</code> and get sent to the homepage.	Your account role is READER. Ask an Admin to raise your role to Author/Editor/Admin in Users.
I open <code>/admin</code> and get sent to the login page.	You are signed out. Log in again.
A menu item is missing.	Your role does not include that section (see Section 2). For example, Authors only see Dashboard, Articles, and Media.
I cannot delete a category.	It still contains articles. The Delete button is disabled until the article count is 0. Reassign or delete those articles first.
My new article is not visible on the site.	Its status is probably Draft. Open it and set Status to Published, then Save.
A comment is not showing publicly.	It is Pending or Rejected. Approve it in Comments.
Breaking-news ticker disappeared.	It may have passed its Expiry time (shows "Expired") or been Deactivated.
The "Upload" button did nothing.	Check the file type (images/video/PDF) and your connection; the button shows "Uploading..." while working.
I changed my own role and it didn't work.	By design — Admins cannot change their own role. Ask another Admin.
I forgot my password.	Use Forgot password? on the login screen to receive a reset email.

End of manual. NamasteExpress (नमस्ते एक्सप्रेस) Admin Panel User Manual, Version 1.0. Keep this document handy for new team members and refer to the Audit Log for a record of all administrative changes.
